

ProneView[®]

Protective Helmet System

Adjustable Protective Helmet System Features

A. Adjustable Knobs

- Four large knobs attached to the helmet offer easier adjustments once the patient has been rotated onto the surgical table
- Easier alignment on to the mirror platform
- Larger range of height adjustment for better neutrality of the neck

B. Mirror Base

- Easily aligns with the pegs located on the base of the Adjustable Protective Helmet
- Allows for continuous eye monitoring during procedure
- Fast and easy clean up, with nothing attached to the surface

C. Disposable Face Cushions

- Specifically designed to fit into the ProneView helmet
- The soft cushions contour to the anatomy of the face providing excellent pressure equalization
- Large eye openings assure no pressure on the orbits
- Available in two sizes

A Proven System of Adjustable Stability

- Ranked best in clinical testing¹
- Superior eye visualization from 3 directions
- Advanced anatomical fit
- Optimum pressure distribution
- Easy neutral neck positioning
- Aids Anesthesiology safety checks
- Easily cleaned with standard disinfectants
- Contoured cushion inserts improve stability
- Designed to meet AORN perioperative standards and recommended practices as well as ASA practice advisories

Quick and Easy Adjustments

Offers a 1.65" (4.19 cm) range of elevation for easier patient positioning

Independent adjustability for improved neutrality of the patients neck

Safe Clinical Uses

Patient Positioning Made Easier

The **ProneView®** Protective Helmet System consists of a sturdy protective helmet, reflective mirror base and a soft cushion insert. Together the ProneView Protective Helmet System provides a safe and effective platform for prone positioning.

ProneView can be used on any general surgical table or on the Mizuho OSI Trios® and Spine Surgery Top. ProneView meets AORN guidelines and recommended practices, and the American Society of Anesthesiologist's Practice Advisory for safe prone positioning.
