### Pediatric Positioner Set

This versatile 4-piece set is designed to position and protect newborns, infants and toddlers during a variety of procedures. Placed flat and used alone, the channeled positioner can help stabilize patients while in supine. Used in combination with a chest roll under the pad at the thoracic area, the chest is extended for anterior chest procedures. Additionally, when used with the small chest roll under the channeled positioner at the thorax and large chest roll at the sacrum, access for posterior supine cases such as spinal tumor resection is enhanced.
