

Everything from a single source

NOVO Product Catalogue 2023

Safe Solutions

Safe solutions for patient care

Innovation, creativity and technical knowledge are our strengths. This is how a product idea in 1987 became a company that is now one of the established and well-known manufacturers of medical fixations for intensive care.

Due to our proximity to the market and our claim to offer comprehensive and high-quality products for optimal clinical results, the expansion of our product range in the areas of ventilation, monitoring and patient safety was a logical step in 2018.

Today, we offer products for medical intensive care and perfectly fitting fixations from a single source. This is what we understand by genuine support for medical professionals in their daily clinical workflows.

Safe Solutions

Our particular strengths

We are experts in what we do. We are constantly expanding our know-how and rely above all on the exchange with other experts. As a user, you know exactly what you need to optimise your daily work, how products should be designed, which individual adaptations would make sense for your patients. This is exactly where we are at your side as a partner. With professional advice, individual product optimisations and comprehensive training.

Individual product optimisation

Whether it's a small detail or a comprehensive product change: we can individually adapt selected products from our portfolio to your wishes and requirements. Contact us, in a personal discussion we will find the right solution together.

In-house production

Our medical fixations are still made by hand in-house. This means short distances and the greatest possible flexibility. From the processing of raw materials to packaging and shipping, quality assurance and fast response times are guaranteed.

Product development in-house

A deep technical understanding and a big heart for medical technology paired with a lot of creativity in the development of new product solutions, all this characterises our development department. In addition to the concerns of users and patients, details such as sustainable production and delivery strategies are also included in development processes.

Product and user trainings

Our consultants will show you what our products can do and how you can use them optimally for your applications. We know your requirements from practical experience and can therefore respond to your questions and wishes on site. Benefit from our expertise and make an appointment.

Three colours - one variety

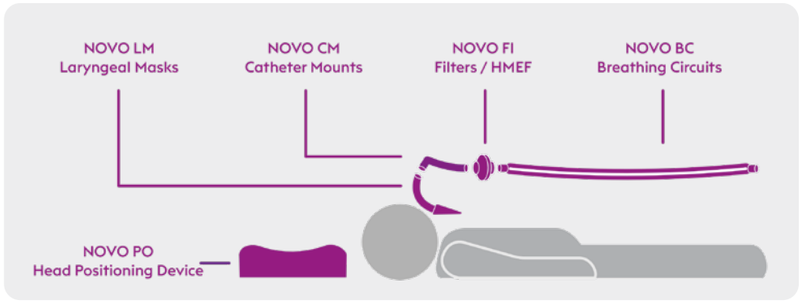

NOVO green

NOVO's own manufactured products - developed and manufactured in-house with the experience of over three decades.
NOVO green - the range of safe medical fixations.
A medical product is only as good as its fixation. With the help of the green colour dot you can quickly and easily find your desired product solution.

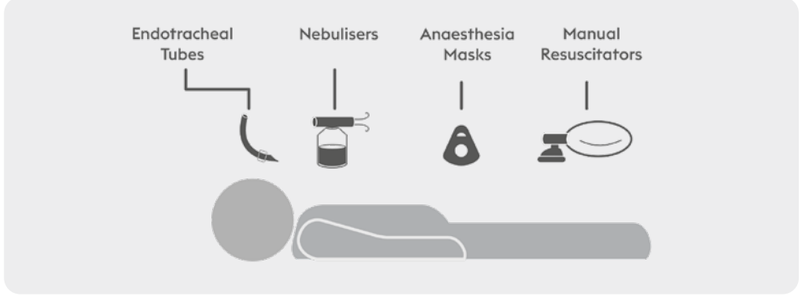

NOVO purple

NOVO branded quality products for respiratory care with a system
Everything from a single source - the product world with the NOVO purple colour dot offers the ideal complement for the care of your ventilated patients.

NOVO grey

Medical products to complement the NOVO range
The products marked in grey complete our green and purple range to form an overall portfolio.

Endotracheal Tube Holders

Overview

The NOVO range for endotracheal tube holders offers the ideal solution for all requirements. The soft and skin-friendly materials are gentle on the patient while positioning the tube securely. Find your preferred fixation technique to simplify your daily tasks.

One-piece, non-adhesive tube holders:

TuBo®-Clip

TuBo®-Clip S

TuBo®-Flex

Two-part, non-adhesive tube holders:

TuBo®-Fix

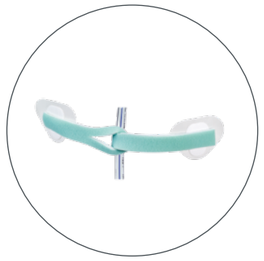

TuBo®-Grip

TuBo®-Guard Set

Multi-part adhesive tube holders:

TuBo®-Lock Set

TuBo®-Clip

One-piece endotracheal tube holder

Product properties

- One-piece tube holder with soft padding
- Fine foam structure on the skin side offers a good grip
- Appropriate for all types and sizes of endotracheal tubes
- Repositioning of the tube and refixation possible at any time
- Suitable for different head shapes, bearded patients and heavily sweating patients
- Suitable for MRI, non-adhesive
- Disposable product

Patient target group

- Adolescents
- Adults

Material

- Soft, laminated foam

REF	Article	Description	SU
20-01	TuBo®-Clip	Padding length 72 cm	100 pieces
20-05	TuBo®-Clip XL	Padding length 85 cm	100 pieces

TuBo®-Clip S

One-piece endotracheal tube holder

Product properties

- One-piece tube holder with soft padding
- Additional adhesive hook and loop strip for extra grip between tube and tube holder
- Fine foam structure on the skin side offers a good grip
- Appropriate for all types and sizes of endotracheal tubes
- Repositioning of the tube and refixation possible at any time
- Suitable for different head shapes, bearded patients and heavily sweating patients
- Suitable for MRI, non-adhesive
- Disposable product

Patient target group

- Adolescents
- Adults

Material

- Soft, laminated foam

REF	Article	Description	SU
20-02	TuBo®-Clip S	Padding length 72 cm	100 pieces
20-06	TuBo®-Clip S, XL	Padding length 85 cm	100 pieces

TuBo®-Flex

One-piece endotracheal tube holder

Product properties

- One-piece tube holder with soft padding
- With sewn-in taffeta strap for tube fixation
- Appropriate for all types and sizes of endotracheal tubes
- Easy and quick to use
- Can be removed without residue
- Suitable for different head shapes, bearded patients and heavily sweating patients
- Skin-friendly, soft materials
- Suitable for MRI, non-adhesive
- Disposable product

Patient target group

- Adolescents
- Adults

Material

- Soft, laminated foam and taffeta strap

REF	Article	Description	SU
20-30	TuBo®-Flex	Padding length 80 cm	100 pieces

TuBo®-Fix

Two-part endotracheal tube holder

Product properties

- Two-part tube holder consisting of middle part and neck padding
- Available in different versions and lengths
- Middle part, neck padding can be replaced individually if soiled
- Additional adhesive strips for extra security
- Repositioning of the tube and refixation possible at any time
- Can be cut individually
- Suitable for different head shapes, bearded patients and heavily sweating patients
- Skin-friendly, soft materials
- Suitable for MRI, non-adhesive
- Disposable product

Patient target group

- Adolescents
- Adults

Material

- Soft, laminated foam

1.2 Breathing Circuits

The breathing circuit techniques at a glance

Extend extendable

- Lightweight
- Flexible in length
- Space saving storage

Smoothbore

- Very good drainage of the condensate
- Very good compliance due to smooth inner structure
- Kink resistant

Coaxial

- Single-limb system
- Inspiratory heating
- Very flexible
- Kink resistant

Bilumen 2-Chamber

- Single-limb system
- Lightweight
- Integrated gas sampling line (at „C“ equipment)
- Very good compliance
- Kink resistant

One equipment system - many options

With the NOVO breathing circuit matrix you will have everything at a glance. Find your right breathing circuit easily according to your personal requirements.

NOVO Breathing Circuits

1.4 Tracheostomy

Individual Product Optimisations

We can individually customise selected products from our portfolio to your wishes and requirements. You can recognise them by our „Optimisation“ icon.

Possible optimisations:

- Length adjustments
- Width of the elastic straps
- Partition of the straps

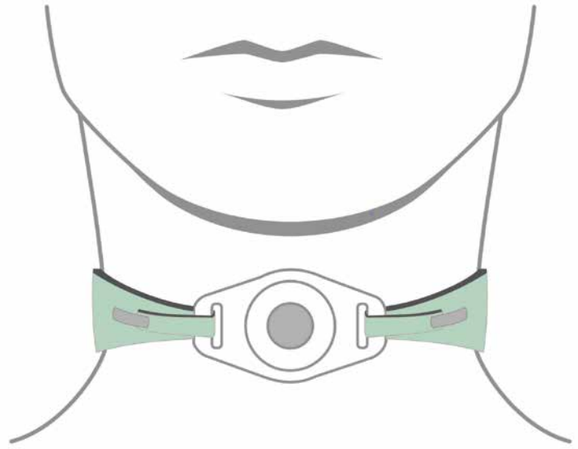

Please feel free to contact us, together we will find the optimal solution for you.

NOVO Edera

One-piece tracheostomy tube holder

NEW

Product properties

- Tracheostomy tube holder with velour lamination, 2,5 cm padding width
- Body side with skin-friendly cotton lamination
- Available with hook or hook and loop fastener
- Centric positioning of the padding due to length adjustment on both sides
- Easy handling
- Soft materials
- Suitable for MRI
- Also available with individual optimisation
- Disposable product

Patient target group

- Children
- Adolescents
- Adults

Material

- Soft foam with velour and cotton lamination
- Elastic strap

BePa-KidsClip®

One-piece tracheostomy tube holder for children

Product properties

- Tracheostomy tube holder with 3 cm wide and breathable padding
- Available with hook or hook and loop fastener
- Centric positioning of the padding due to length adjustment on both sides
- Easy handling
- Skin-friendly, soft materials
- Suitable for MRI
- Disposable product

Patient target group

- Premature babies
- Neonates
- Infants
- Small children

Material

- Soft foam with skin-friendly coating
- Elastic strap
- Latex-free

3. Infusion and Surgical Drain Management

Optimally fitting fixations support the medical devices in fulfilling their tasks and are thus the basis for safe infusion & drainage management. Here you will find fixation solutions for infusions, drains and decubitus ulcer prophylaxis.

3.1 Fixations 82

ECMO-Fix

Fixation for catheter tubing systems

Product properties ECMO-Fix 1

- Patented product solution
- Fixation consisting of 1 fixation strap, 2 fixation plasters and 1 fixing loop
- Fixation strap with 2 hook and loop straps and hook and loop fastener
- Easy to use
- Fixation strap individually adjustable to head circumference
- Position correction of the catheter tubing set possible at any time
- Fixing loop alignable to the position of the acces
- Optimal cushioning of the catheter tube from the skin
- Disposable product
- Suitable for MRI

Product properties ECMO-Fix 2

- Fixation consisting of 1 fixation strap and 1 plaster fixation
- Fixation strap with 2 hook and loop straps and hook and loop fastener
- Easy to use
- Fixation strap individually adjustable to the thigh circumference
- Position correction of the catheter tubing set possible at any time
- Skin-friendly, soft materials
- Optimal cushioning of the catheter tube from the skin
- Extra wide strap to protect against decubitus ulcer
- Disposable product
- Suitable for MRI

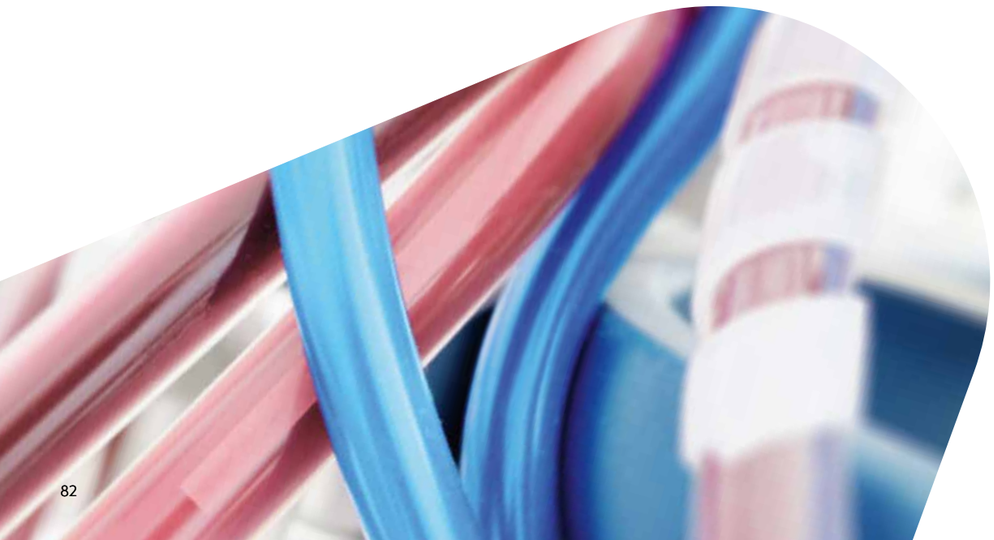

Patient target group

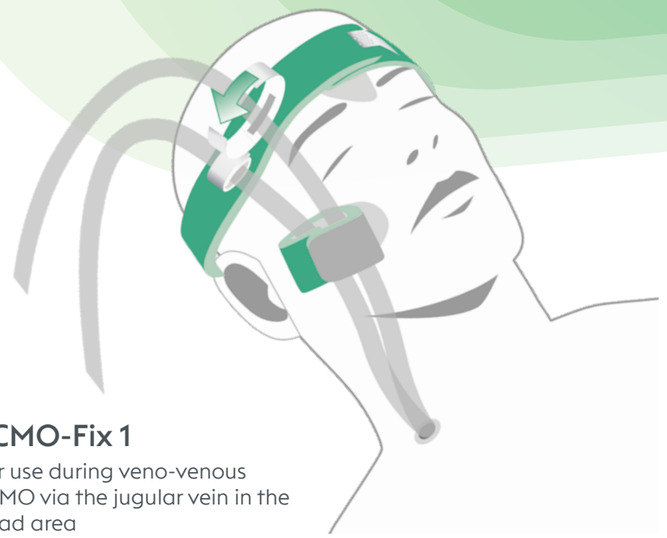

- Adolescents
- Adults

Material

- Soft foam with skin-friendly lamination
- Latex-free

5. Hygiene & Cleansing

Oral hygiene is an important factor in the treatment of intensive care patients. Here we present our innovative product solution for the care and protection of the oral flora.

5.1 Oral/Dental care **98**

Hygiene & Cleansing

Gentle and effective product solutions for daily care and cleaning

Our Jack Pro® Products with the Oral Hygiene Concept® enable carefully performed antiseptic oral care. In accordance with the Commission Recommendation (RKI), we use substances with proven efficacy.

Jack Pro® Liquid plus and **Gel plus** are bioscientific products for oral cleansing, germ reduction and wound care in respiratory patients, as well as in oncological, paediatric and geriatric care.

Our product solutions support both the self-management competence of patients and caring relatives and the care process for the maintenance, promotion and treatment of oral health by professional nursing staff in inpatient and outpatient facilities. This includes the following target groups in particular:

- Laryngectomy or tracheostomy patients
- Elderly patients, adults and children in need of care, including patients in intensive care, oncology, radiology and oral and maxillofacial surgery
- Patients with immune deficiency
- Patients with periodontitis-associated diseases

The main pathogens of classic nosocomial infections are combated. They are already inactivated, weakened in growth or killed with a low dose of active ingredient. Jack Pro® protects and supports the physiological oral flora.

Product properties

- Mild ingredients - gentle on the oral cavity, teeth and gums
- Long-lasting use - suitable for daily use
- Biocompatible - maintains the ecological balance of the oral cavity and supports its regeneration
- The gel can be used to clean the teeth, it does not need to be be rinsed out
- Creates a long-lasting moist oral mucosa
- No protein defect in bleeding and purulent wound healing disorders
- As an oral cleansing concept, it complies with the bundle recommendation of the Cambridge VAP Guideline of May 2022
